Forecast for Thursday 10 Mar 2022

Weather: Extensive hill fog and light drizzle through early morning. Turning dry towards mid-morning with cloud then gradually lifting and breaking, giving hazy sunshine by mid-morning. An increasingly windy afternoon with summit gales developing. Some clear spells to start the night, but high cloud thickening overnight.

Chance of cloud-free hill tops above 700m: Nil early morning, 90% from mid-morning.

Low cloud and visibility: Very poor through to start the day with extensive cloud down to low levels. This lifts and break from mid-morning to leave summits largely clear of cloud by and from late-morning.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Winds likely to be around 10 mph stronger than the 600m winds across the main summit ridge and higher peaks during the afternoon, with severe gales early evening.

Forecast for Friday 11 Mar 2022

Weather: Dry but cloudy morning, perhaps a few brighter spells, but severe gales across the tops. Thicker cloud and rain in the afternoon. Winds gradually easing, then dry but cloudy evening and start to the night.

Maximum wind: Southeast 40 mph gusting 55-60 mph, easing to 30 gusting 40 mph late afternoon, then Southwest 215 gusting 25 mph late evening.

Chance of cloud-free hill tops above 700m: 30%, best chance in the morning.

Low cloud and visibility: Often very poor on the tops in cloud, bases around 500-600m, a few break possible in the morning, but cloud turning persistent in the afternoon

Temperature: **Valleys:** Plus 7 Celsius rising to 9 Celsius.
At 700m: Plus 2 Celsius rising to 4 Celsius.
Freezing level: Just above the summits.
